

2015 ILSOB Addendum:

The 2015 Annual Report of Independent Living Services for Older Blind Individuals survey, analysis, and report were conducted as a portion of the 7OB federal reporting. The original intent of the report was only for this use. In utilizing the results of the study for a different purpose, it is important to note that the response rate for the survey was not representative at 95% +/- a 5% margin of error. The response rate was not high enough to allow inferences to be made about the total population based on the responses received. Therefore, the analysis ought not to be construed as applying to the whole population, but interpreted as the opinions of the respondents only. Because of the small size of the target population of the survey, the research staff has historically been unable to obtain a representative sample.
